## ROAD BUILDING

### MATERIALS IN MODERN ROAD

Hummelstown Pike, Considered a Model by Experts, Built by Telford-Macadam Method.

The Hummelstown Pike, near Harrisburg, Pa., has been considered by experts to be a model road. It was built in 1908, using the telford-macadam construction; native limestone was used for the telford course, and Birdsboro trap rock for the top, says a writer in Northwestern Agriculturist.

There are certain sections of this highway that were flooded during a cloudburst, and the top surface which was washed off the road was replaced by growing with one part cement and two parts sand.

The road was built nine inches in depth, five inches telford and four inches macadam course. Shortly after completion there were several surface treatments of a light coal tar product, consisting of a mixture of water, gas, tar, cement, liquid asphaltum, road oil, carbolic disinfecting powder, sulphate of copper and oil of wintergreen. The sulphate of copper was used to prevent the oils from becoming ignited, and the wintergreen counteracted the odors of the others. A curious effect of the mixture was said to be its disinfecting power, there not being a single contagious disease in that section. Unfortunately, however, this does not appear to be lasting, as at this time, four years after it was applied, there is no evidence of this tar product on the road.

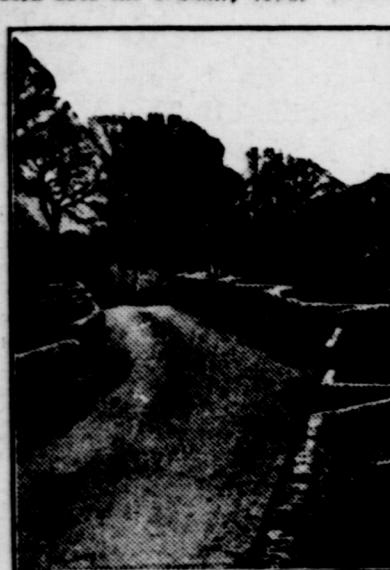

During the last season the maintenance department resurfaced another section of this road between Rutherford Subway and Swarts Creek. This work consisted merely of placing about four inches of crushed stones upon the old roadbed, and blinding with sufficient screenings wetted and rolled.

### EXPERTS MULCH WILD ROADS

Explanation of Failure of Authorities Generally to Maintain Roads and Streets.

The astonishing results of a census taken recently on a secondary thoroughfare leading out of London showed only 3 per cent of horse-drawn vehicles. The exact count was 15 vehicles of the latter class to 500 vehicles propelled otherwise than by horses. Herein lies both an explanation of the failure of public authorities generally throughout the world to maintain roads and streets in good condition, and also a presentation of the difficulties that road constructors now confront.

A similar example of the extraordinary change that has occurred in the use of roads in recent years is that of a furniture manufacturing concern in Easton, which delivers on its own trucks in New York city instead of using the already-constructed steel roads, namely, the railroads. This concern uses the ordinary roads. A con-

## Horticultural Advice

### MAKING PROFIT WITH PEARS

Advantage of Dwarf Variety Is That They Come Into Bearing Early — Rich Soil Is Preferable.

Both standard and dwarf pears are desirable for planting. The advantage with the dwarf pear is that they come into bearing early, and never attain a great size, hence are well adapted to planting where the ground is limited. Then they usually come into bearing so early, two or three years after planting out, that several crops may be secured before blight kills the trees.

They are, however, not as long lived a tree as the standard, and in one sense this is an objection, as it necessitates planting often. But it will be an exception even on a small place, when it will be best to plant a few dwarf pear trees, the number being proportioned to the number of trees planted.

Standard pears, if kept healthy, are very long lived, and they will bear fruit a long time, but they are longer coming into bearing than the dwarf, and need considerable more sun. When planted for family use, two or three varieties can be planted to good advantage—an early, medium and late, in order to lengthen out the season. If properly cared for late pears may be kept for a considerable time after ripening. When grown especially for market there should not be too many varieties, as properly managed, one or two good varieties will pay a better profit than a large number of varieties. A reasonably rich soil is preferable in order to secure a strong, vigorous growth. This will greatly aid in preventing blight, as a vigorous, thrifty tree is less liable to be attacked than an unthrifty one.

Then plenty of potato starch should be supplied. Wood ashes, old vines or something of this kind can be put around the tree with benefit, and will help to secure a better growth and a tree less liable to be attacked by disease. There is rarely an overstock of pears in market, so that good prices can nearly always be depended upon.

### GASES ABSORBED BY GRAPES

Trees, Garden Plants and Vineyards Damaged by Emanations from Chemical Works.

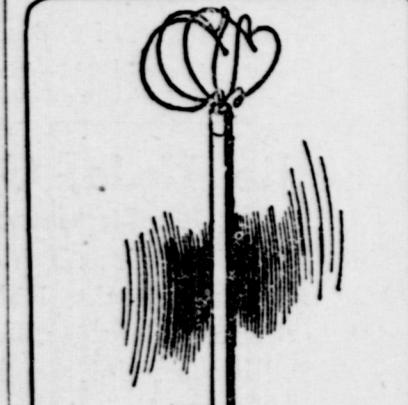

A German botanical journal has noted a case where trees, garden plants, and vineyards have shown damage resulting from their proximity to chemical works. Emanations from these works deposited powder on the foliage. Analysis of the powder showed that oxalic acid or its salts made up nearly one-third of it and that sodium compounds were also present. The leaves seemed especially sensitive on their lower sides.

The wine from the grapes grown in the neighborhood of the chemicals possessed a peculiar taste that was attributed to their absorption of the foul gases permeating the air.

### FRUIT PICKER QUITE USEFUL

Wire Basket on Top of Long Pole Reaches Into Branches—No Step Ladders Required.

For picking fruit that is beyond the unaided reach, a man in Montana patented the implement shown in the sketch. A basket-shaped wire device, open at one side, is fixed to the top of a long pole. Points of the wire come down in front so that an apple, or pear, or whatever the fruit may be, can enter from the side, but will not fall out in front. Once the fruit is encompassed in this framework a

English Road Built to Last.

siderable tonnage is thus transferred from the steel roads, specially constructed to bear it, to the country road, not constructed for any such weight or friction. It has thus come to pass that the science of engineering, which was called upon to furnish experts to railroad companies, is now also called upon to furnish experts to road-building authorities.

The greater the pressure of tonnage, the heavier the expenditure must be on the structure that is to withstand that pressure, whether it be railroad, country road or city street.

#### Tankage for Hogs.

Tankage is a product of the slaughtering-houses. It is a prepared food, cooked and steamed, then dried and ground. Because it is so rich in protein it is very desirable for balancing farm-raised feeds. It has been discovered that using one or two parts of tankage with eight or nine parts of corn not only gives better growth and development to young hogs, but brings fattening hogs to a finish much quicker and cheaper.

smart pull will detach it. With such a tool no stepladders are needed to strip a tree and fruit that hangs high may be reached without shaking the tree. Fruit that is shaken down is often bruised in its fall. Another advantage of this picker is that it enables one to secure the identical apple he may want without knocking down half a dozen others.

## LIVE STOCK

### CARE IN HOG BREEDING PAYS

Breeder Must Choose the Breed That Most Nearly Conforms to His Particular Purpose.

Hogs are peculiarly susceptible to environment and rapidly improve or retrograde through the infusion of good or inferior blood. Because of the ease with which they take advantage of improved conditions and the wonderful improvement to be noted in form and size, no other class of live stock furnishes more satisfaction to the conscientious breeder. He has many good, but not all alike suited in temperament to one locality or one method of management.

Then, again, different types attract different tastes, and the breeder must choose the breed that most nearly conforms to his particular purpose and preference, remembering always to select animals showing strong in the points and characteristics of the breed chosen, says the Orange Judd Farmer.

In breeding for improvement in any variety much can be accomplished. Improvements may be discernible in each effort if rightly conducted and a breeder may reasonably expect satisfactory results in molding a hog to his own ideas within three or four generations.

With such rapid progress swine breeding proves extremely fascinating, but great danger lies hidden in such rapid progress.

Stimulated by each pronounced improvement of the shape of ear, length of leg, color or formation of body, the breeder must not overlook the fact that the farmer is essentially practical. He cares little whether the ear has an arched droop or stands upright, whether the hair is straight, curly black, white or red. He wants a hog that will produce the largest amount of revenue in the shortest time with the least expenditure. To this end it stands the breeder in hand to have for his ideals a hog large in size, strong in bone, with well-shaped hams and shoulders, one that will fatten quickly and cheaply.

### GROW SWINE FOR SLAUGHTER

Featuring Crops for Hogs Should Be Sown on Specially Drained and Prepared Land.

To produce pork profitably hogs must feed and graze continuously on pastures and crops particularly planted for them. Very seldom is the

Growing of hogs for slaughter a source of profit unless proper grazing and feeding methods are followed.

In the spring, summer and fall there are many crops for pasturing hogs, but during the winter the crops to select from are limited. On almost every farm the production and keeping of hogs in winter is expensive, and generally it is not profitable for the reason that large quantities of corn are fed without products of green crops. More winter grazing is needed, for which many crops are adapted, the most reliable are, however, rye, oats, wheat and barley.

For grazing purposes these pasturing crops for hogs should be sown on specially well drained and prepared land that is either rich or has received a liberal application of manure. Good winter pasture is not obtained except on the best-drained lands.

The seeding should be heavy to insure a thorough planting. The young plants will grow slowly in the winter and many plants will be needed to furnish plenty of pasture. Crimson clover will do well with rye, rye, oats, wheat and barley, and will mean an improvement on the land.

### RESTORE FERTILITY OF LAND

Live Stock Farming Is Surest, Cheapest and Quickest Method—Few Crops Sold.

Where lands have been "cropped to death," as some plain people aptly term it, live stock farming is the surest, cheapest and quickest method of restoring its fertility. In live stock farming the crops raised on the farm are grown primarily for the purpose of feeding one or more classes of live stock, and but little is sold except animal products. On the other hand, concentrated feeding stuffs are purchased for feeding the farm animals, which adds to the amount of fertility returned to the land in manure. Since the animal products sold do not, as a general rule, contain large quantities of fertilizing ingredients, it is easy to rapidly increase the fertility of land by this system of farming.

## DAIRY

### SELLING HEIFERS FOR BEEF

System of Depletion of Breeding Stock Is Going on Continuously—Money for Feeder.

Notwithstanding the general scarcity of cattle in the country, which is conceded by every cattlemen of intelligence, there continue to appear in all the stockyards daily journals reports of carloads of extra fine yearling heifers that brought the top price for the day, etc., says Twentieth Century Farmer. Of course, these reports are true. It is an absolute fact that carloads of the very best heifer calves have been bought, fattened for the beef market and shipped back and sold to the packers for slaughter.

This system of depletion of the breeding stock of the country is going on continuously in the face of what might be termed a cattle famine. Who will stop? Not until these

Good Dairy Foundation.

heifer calves will bring more for breeding demands than they do now, or will bring as feeders. As long as the feeder can afford to buy this class of cattle and make his feeding venture profitable, or more profitable by using other kinds of cattle, he will keep right on buying and feeding these choice heifers, calves and yearlings. There may be a little excitement in this business with some people, but there are so few of this kind of persons in the beef-making industry that they are lost sight of in the scramble for gain of the almighty dollar.

### PROPERLY BALANCED RATIONS

Report of Results of Tests Made by Illinois Station—Digestible Nutrients Saved.

(By H. R. FLINT, Minnesota Experiment Station.)

A balanced ration is "one in which each of the different food materials or nutrients is present in just the right proportion and amount to meet the needs of the animals," says Bulletin 159 of the Illinois agricultural experiment station. Tests indicated that cows fed balanced rations yielded a pound of butter fat for each 17 pounds of total nutrients consumed, while 21 pounds were consumed to a pound of butter fat when an unbalanced ration was fed. The use of the balanced ration thus saved four pounds of digestible nutrients for each pound of butter fat produced, or a pound and a quarter of butter fat was produced by the same number of pounds of digestible nutrients in balanced rations as was required for a pound of butter fat when the unbalanced ration was fed.

Not only was the butter fat more economically produced, but the cows given a balanced ration finished the test with better appetites and in much better flesh and general physical condition than the others. It is not especially difficult to gain the profit resulting from the balanced ration.

### Building a Silo.

For green feed to supplement the pasture during the latter part of summer and early fall, one acre for 15 head of cows should be planted. Have one large field, and drill the corn the long way of field. Be sure to have the ground finely pulverized and rolled; the field can then be quickly planted and early cultivation given. Corn is the best crop to grow for green feed for the silo, or to cure for winter feed.

### Increasing Capacity of Farm.

Churning at too high a temperature or churning too long will produce a greasy butter in which the grain is injured.

### Cleaning Dairy Utensils.

After the dairy utensils have been cleaned, invert them in the pure air and where the sun will strike them.

## DON'T BE DISCOURAGED

THURSDAY, AUGUST 27, 1914.

Entered at the Greenville, Ky., postoffice as second-class matter.

MEANWHILE the allies have not captured Milwaukee.

"ALL the comforts of civilization?" Quit your kidding.

Food speculators have had a reckoning coming to them for ever so long.

WHILE we are busy moving our crops, in Europe they are moving corps.

If Europe had joined in the "safe-ty first" crusade there would have been no war.

We are beginning to appreciate that it is better to have a Peace President than a War King.

It hurts Americans to have to pay war taxes because some European monarchs decided to fight.

TURKEY has wisely concluded to remain neutral and give the Christian nations a monopoly of fighting.

IN Europe's one hundred years' war everybody forgot what he was fighting about; in this one nobody has ever known.

PEACE seems to be extending her vacation, and it begins to look like the small balance of the world will be engaged in war.

SOME uncensored war news is now getting to the public, and it shows that Germany has been winning all along, as many people have suspected.

EUROPE's bottling works are running overtime. First to be bottled were American tourists, then the German fleet and finally the war news.

WE escaped a war with Mexico, but now that three fourths of the world is engaged, it will be a hard matter for us to keep out of the fray.

EVERYBODY is hoping that we will like our home-made fashions in dress better, now that we have been compelled to abandon the foreign barbitaries.

If American restaurants would follow the German example and cut all French names from bills of fare they would delight most of their patrons, who are not proficient in solving language puzzles when they are hungry.

EVERY man who as a boy owned and used one of those "made in Belgium" shotguns wonders how such a vigorous and effective resistance was given the Germans; if the guns used at home are on a line with those shipped out.

GENTLEMAN down in front wants to know what mysterious process beef undergoes that makes it cheaper when it is corned than when it is fresh. This is no time to ask questions about cheap meat—an answer might prove discomfiting. Eat what is set before you, asking no questions, for conscience sake."

THE South is moving forward along all lines, and in some respects is showing the North and East how to do things. Florida is making more rapid strides than any state in the South, in the matter of improved highways, one county, DeSoto, this year putting more than a million dollars in permanent roads and bridges.

## Winter Barley Supplements a Failing Corn Crop.

In only one year out of the last four Kentucky produced a good corn crop. The 1911 crop was very small, the 1912 practically a failure, and 1913 promises a smaller crop than any of the four years. The failure of the crop this year following the scant crop of last year will seriously affect the live stock interests of the State. Indeed it is probable that the growth of the industry has already been greatly checked.

While it is earnestly to be hoped that next year will be more favorable for corn production than the past few have been, there is no assurance that such will be the case. The records of the Weather Bureau show that dry years are just as liable to be followed by dry years as by more favorable conditions. In other words, nature does not compensate for a dry year by a wet one. This has been pretty well illustrated right here in Kentucky.

Although corn will undoubtedly always remain the most important feed crop of the State, the repeated failures in recent years show that it is a mistake to depend upon it so absolutely, as has been the case in the past. There are other crops not affected by summer droughts that can be grown in Kentucky and prove profitable feeding crops. One such a crop is winter barley.

Winter barley is a practically sure crop in Kentucky if sown reasonably early. It will make a yield of from 30 to 60 bushels per acre on good corn land and in feeding value it is about the equal of corn pound for pound. In fact it more nearly approaches corn in composition than any other of our cereals. Winter barley matures about the first of June in the central part of Kentucky, and is available for feed the earliest of all grain crops. Winter barley furnishes excellent fall pasture and can be pastured considerably in the spring and still produce a fair crop. It is the best nurse crop we have for clover and grasses. Maturing so early, it is possible to mature other crops on the land after its removal. Barley should be sown preferably early in September, but in the southern part of Kentucky it can be sown as late as the first of October with a reasonable degree of safety.

Turf oats is another fall sown crop that can be grown satisfactorily in Kentucky, especially in the western part of the State. The secret of success with this crop is early sowing. If sown by September 1 to 10, these oats will stand all but the most severe winters and will yield much better than spring sown oats, and they are not injured so greatly by dry hot weather.

Arthur Woods, the young and able police commissioner of New York, lays down a new catechism for policemen. The police, he says, should be the "eyes of the public." They should not merely trail crime and deal with disorder—they should seek to prevent these by keeping an eye on the causes of crime.

The policeman, Commissioner Woods thinks, should be a sort of "big brother" to the boys and girls in his district. He should not merely wait until a boy commits burglary and then go after him. He should nip the potential burglar in the bud. What the father, locked during the day behind factory gates, fails to notice about the conduct of his son the policeman on the beat should note for him. What the mother, absorbed in her domestic duties, fails to observe about the conduct, or the lack of conduct, of her daughter the policeman should observe. And if he finds a boy or girl starting out on the wrong road he should promptly inform his or her parents. The police, too, should stand in closer co-operation with the charity, philanthropic, juvenile, and other corrective agencies, he thinks.

No one will quarrel with New York's police commissioner over his new program for the conduct of police officers. Most people will agree with him that his conception of the duties of a policeman is in the main a right conception. Police should be in closer touch with the civic life of the community.

They should be servants of the public. Not many, on the other hand, will take the pronouncements of the Gotham police head seriously until the provisions outlined by him are carried into force. What the public wants today is deeds, not words.

It is not the first time the police of New York and other cities have been "reformed" in official programs and in statements to newspapers. It will require more than rhetoric to convince the public that the police of our large cities have purged themselves from age long inclinations to slovenliness, inefficiency, and corruption.

Missouri is observing her second "Good Roads" week, with increasing response and effect. Kentucky should make another try at it, as our first attempt last year was almost a total failure.

## Double Time—Forward.

Let the arms of construction go forward. As the single call of the arms of destruction resounds through the cities of Europe, let the call of a higher patriotism be heard in the cities of America. Let us build up rather than destroy. Let us have vision to see beyond the clouds of the present into a future which nothing but our own blindness can obscure. In the hardships of the American industry resulting from a great European conflict, let our cities act as the nation's balance wheels. If unemployment threatens, let not public improvements halt. The credit of our municipalities is sound. It is wiser to build roads than to open soup kitchens, and real patriotism prefers the laying of water mains for the living to the digging graves for the dead. Let the arms of construction go forward.

## The Editor's Creed.

To be humbled by the responsibility rather than exalted by the power of the printed word.

To seek the truth diligently and write it simply.

To hold his pen to strict account for intemperance and exaggeration.

To judge no man nor speak ill of him unless by doing so comes greater good.

To speak plainly about public evils without fear.

To keep an open heart for the needs of those who toil and an ear ready to the cry of the unfortunate.

To visit scorn upon those whose power or wealth is earned by the oppression of the poor.

To expose scheming and hypocrisy in high places.

To accept fair criticism with candor and misunderstanding with a smile.

To abate no jot of his conviction, whether to reader or advertiser for money's sake.

To picture the world as God made it, darkened occasionally by war and passion, but brightening from year to year as man deals more justly with his brother and as he sees more frequent and less broken glimpses of the divine plan.—Collier's Weekly.

## Deeds, Not Words.

Arthur Woods, the young and able police commissioner of New York, lays down a new catechism for policemen. The police, he says, should be the "eyes of the public." They should not merely trail crime and deal with disorder—they should seek to prevent these by keeping an eye on the causes of crime.

The policeman, Commissioner Woods thinks, should be a sort of "big brother" to the boys and girls in his district. He should not merely wait until a boy commits burglary and then go after him. He should nip the potential burglar in the bud. What the father, locked during the day behind factory gates, fails to notice about the conduct of his son the policeman on the beat should note for him. What the mother, absorbed in her domestic duties, fails to observe about the conduct, or the lack of conduct, of her daughter the policeman should observe.

And if he finds a boy or girl starting out on the wrong road he should promptly inform his or her parents.

The police, too, should stand in closer co-operation with the charity, philanthropic, juvenile, and other corrective agencies, he thinks.

No one will quarrel with New York's police commissioner over his new program for the conduct of police officers. Most people will agree with him that his conception of the duties of a policeman is in the main a right conception. Police should be in closer touch with the civic life of the community.

They should be servants of the public. Not many, on the other hand, will take the pronouncements of the Gotham police head seriously until the provisions outlined by him are carried into force.

What the public wants today is deeds, not words.

It is not the first time the police of New York and other cities have been "reformed" in official programs and in statements to newspapers.

It will require more than rhetoric to convince the public that the police of our large cities have purged themselves from age long inclinations to slovenliness, inefficiency, and corruption.

Missouri is observing her second "Good Roads" week, with increasing response and effect.

Kentucky should make another try at it, as our first attempt last year was almost a total failure.

This is the first National Meet to be held west of Pittsburgh. The United States Bureau of Mines will send to Terre Haute its largest explosion chamber to be used in demonstrating rescue work following explosions in mines. The large steel cylinder makes a load of four freight cars. It will be erected in the park of the Terre Haute Central League Baseball Club where all the events will be under the direction of the American Red Cross.

Baseball Club where all the events will be given.

## Significance of the Presidents, Summer Clothes.

The Public Ledger, Philadelphia, says editorially:

"Hardly less significant as a precedent than the appearance of the President at Independence Hall on the Fourth of July was his appearance in a white duck suit with a Panama hat. The summer costume of the average American man is as inappropriate to the season as the costume of an equatorial African savage would be in this city in mid-winter. Men do not dress for comfort, but to please Mrs. Grundy. They are afraid of what someone will say if they go to business in white duck or white flannels, in seersucker or linen. A few heroic souls, however, brave convention and wear cool costumes on a hot day. But what a refreshing sight our streets would be at noon if the men coming from the stores and offices all appeared in white, or light tan, coats and trousers. The impression of coolness would be so contagious that even the mercury in the thermometer would seem to drop."

The fall term of circuit court will convene here on Monday, Sept. 7. The docket is heavy, and there will be a vast amount of work for the grand jury.

## New Firm in Town.

Head, Stirsman & Co., composed of Fred Head, Tom Stirsman and John F. Green, has been formed, and will occupy the Hale stand in the Yeargin building, South Main street. An up-to-date line of dry goods, notions, furnishings, shoes, will be handled, and sold at the very lowest cash prices. All the members of the new firm are widely known, and popular, and will command general patronage from the people of the county. The concern is a most welcome addition to our enterprises, and will do its full share toward the advancement of the town and county.

The fall term of circuit court will convene here on Monday, Sept. 7. The docket is heavy, and there will be a vast amount of work for the grand jury.

## Chautauqua Course Contracted.

Mr. Wayne P. Sewell, representing the Alkahest Lyceum System, of Atlanta, yesterday closed a contract with a committee of the guardians of the local Chautauqua course for a five-day entertainment here next summer, at a date to be announced later. This is a move that will interest everyone in the county, and our people are to be congratulated on securing such an elevating and instructive form of entertainment.

Mr. Cecil E. Roark will complete this week a concrete silo on his farm south of town. This is the last of a quartet of such modern equipment built near here the last few weeks.

## Autoists, Look Out.

Inspectors who are covering the State are apprehending great numbers of persons who are driving motor vehicles unlawfully, as they have no license. Fines are being imposed in every case, and where there has been any act of a serious nature in connection with the unlawful practice, the driver is refused a license. It is reported that inspectors will move in to this section at once, and every driver should be careful that he is within the law.

Next Monday is county court day, and there will be the largest crowd here since last spring, as farmers are somewhat at leisure now, are feeling much better, and are ready to shop some and mingle with their friends socially.

Messrs. Irvin & Gilman received a carload of six Ford cars last week, and sold four the first day, telegraphing for another carload that night. If every agency does as well there will be no trouble in the factory selling the required 300,000 cars before next August, insuring a return of \$40 to \$60 to each buyer, as guaranteed by the Ford Motor Co.

The annual observance of Children's Day will be held at the Methodist church next Sunday morning at the hour of regular service. The program is an interesting one, and the exercises will be very impressive. Everyone is invited to attend.

People who have been eager for a war with Mexico may soon have opportunity to see our country engaged on a larger scale, for the war spirit appears to be riding down all forces of reason. When sufficient men and money have been sacrificed to satisfy the most brutal and profane, then there will be a return to intelligence, to really settle any differences that were supposed to exist.

## Notice to Settle.

All persons indebted to the firm of R. Martin & Co., dissolved, are hereby notified to call at once and settle, and save costs, as the affairs of the firm must be closed.

2. R. MARTIN & CO.

## Methodist Church.

Children's Day Service next Sunday, August 30, at 11 o'clock.

Rev. S. J. Thompson, Presiding Elder, will preach Sunday evening at 7:30.

Quarterly Conference Monday evening at 7:30. You are cordially invited.

G. P. Dillon.

Mr. John A. Williams, of Lexington, is here on a visit to friends.

He has not heard from his daughter,

Mrs. J. T. Pendleton, who was en route to Paris when the war broke out, but the ship on which she sailed was diverted to England, and so she is safe, it is certain, and will likely soon return.

## Announcement

The organization of our firm, R. Martin Dry Goods Co., has been perfected, succeeding the firm of R. Martin & Co., at their old stand. Progressive methods of merchandising will be employed, both in gathering and selling goods. We shall secure all the benefits that cash will command, and under the existing conditions of trade we find we are compelled to confine ourselves to practically a cash basis. Our credit business must of necessity be limited, and short term. We trust our friends and customers will fall in with this plan and favor us with settlement every thirty days, if possible. Our offerings will contain merit, and there will be the appealing feature of narrow profits and consequent low prices. We hope for a continuance of the good feeling and generous patronage that have so long existed, and our pledge to the public is to protect the interests of all who favor us with their patronage.

Very truly yours

R. MARTIN DRY GOODS CO.

### I. C. R. R. LOCAL TIME CARD.

#### Town House And 8 Acres Land For Sale.

I will, on the last Monday in August [county court day] offer for sale to highest bidder at 2 o'clock, p. m. at court house door in Greenville, Ky., the D. H. and M. E. Martin property on West Main-cross street, a residence and 8 acres of land. Will sell as whole or part.

3t C. E. O'BRYAN, Admr.

#### Notice to City Taxpayers.

All persons who have failed to pay city taxes are hereby notified that sales will be advertised and made to satisfy these amounts. Prompt action will save added costs.

4t W. R. DENNIS, City Marshal.

Services at Unity church, the annual Association exercises, drew large crowds from all over the country yesterday, and will today, also, when the exercises close.

#### Notice to Stockholders.

There will be a meeting of the stockholders of the Greenville Light & Water Co., in the county court room, Greenville, Ky., on September 7, 1914, at 7:30 o'clock, p. m.

J. A. Gilman, Secy.

#### Notice.

We are now agents for all magazines and papers published anywhere and in any language. Lowest possible prices on clubs or single subscriptions.

MARTIN POOLE Agency,

4t Greenville, Ky.

Rev. R. H. Tandy and his wife returned the latter part of the week from a month in Eastern Kentucky, where relatives and friends were visited.

Mr. Otto A. Rothert, of Louisville, is spending the week in the county with his many friends, but will stay only a short time this trip. He hopes to return in a few weeks and spend a fortnight or more in the country.

Mr. Fred Head is in St. Louis, buying goods for the new firm of Head, Stirman & Co. He is accompanied by Miss Lena Arnold, who will buy the dry goods.

If you break the glass in your Ford automobile, get another at Roarks for a quarter.

Miss Jessamine Barkley is home from Nashville for a short while, with her mother near town.

Mr. and Mrs. Herman Sumner, of Central City, were guests of Mr. and Mrs. T. E. Summer Sunday.

Mr. T. C. Brown is now testing the delights of motoring, having recently become the owner of a Ford touring car.

For automobile transfer see Tom Hammond, trips made anywhere, at any time and prices are right. Telephone No. 170.

Mrs. Jesse Nichols and two children, of Louisville, are spending a few days with Mrs. Nichols' father, Mr. J. N. Corbett.

Everybody is preparing for the school fair, and the people in town are as busy as the teachers and pupils.

#### County W. C. T. U. Convention.

The eleventh annual Convention of the Womens' Christian Temperance Union of Muhlenberg County was called to order by the President Mrs. P. K. Saulsberg at 10:15 A. M., August 20, at Central City. Devotional exercises, conducted by Mrs. Fowler, of Central City. Opening song No. 22 in the W. C. T. U. song leaflet. Scripture Reading, the Crusade Psalm, (146).

Prayer by Bro. Currie of the M. E. Church of Central City.

Song, Onward Christian Soldiers, was sung by the Convention.

A hearty address of welcome by Mrs. McNeal was given followed by a splendid talk by Rev. Tu-k, of Central City. Bro. Tuck said so many good things it made our hearts glad and both visitors and delegates did feel welcome.

Mrs. Kirkpatrick, of Greenville, responded in a few choice words of appreciation.

Roll call was next on program, Depoy 3, Greenville, 12, Central City, 12, each member answering earnestly with a Scripture verse in which was found the word "faith".

Mrs. Franklin read the minutes of last convention which were found correct.

Mr. Mellin of Owensboro was then introduced to Convention; he gave us a talk which was appreciated by all, as his County is on the battle line, now making a brave fight.

Song, Stand up for Prohibition, was sung by Convention.

Bro. Tuck then told us of "The dream that was coming true," how the "fight was on," and the progress of the last 50 years; how temperance had advanced right along with the emancipation of woman. He also gave such a beautiful tribute to Mothers, Homes—yes and Fathers, too. He said young people should soon be singing something different than "Everybody works but Father," for the men of our County and State were glad to follow where women pointed the way.

Bro. Currie made a cheering talk full of hope and encouragement and told us more about the fight in different counties.

Mrs. Rice, of Greenville, suggested that we send a word of encouragement to Daviess county. This suggestion prompted several short talks from different ones and our President appointed a Committee composed of Mrs. V. H. Franklin and Mrs. Rice to write the letter of encouragement and send to the President of the Owensboro Union.

Convention then decided at Bro. Currie's suggestion, we make a set of Resolutions against the Liquor Traffic, and forward to the counties which are in the fight. Mrs. Wilkinson and Mrs. Rice of Greenville, Bro. Currie and Mrs. Fowler of Central City were made a committee to attend to the matter.

After another song Mrs. Jennie E. Roark of Greenville told us the meaning of the Nootide Prayer, when every White Ribboner the wide world over is expected to breathe a prayer to God for protection and redemption of the world from sin and vice. Nootide prayer lead by Mrs. Roark. Convention adjourned for refreshments.

Promptly at 1:30 P. M. Convention was called to order by the President.

The devotional was conducted by Mrs. Wilkinson, Scripture 23 Psalm in concert.

Song, Some Glad Day. Prayer by Mrs. Rice.

Mrs. Fowler then read an interesting article on "License". The nomination was composed of Mesdames Wilkinson and Franklin of Greenville, and Mrs. Lam of Central City.

Mrs. Rice made a splendid talk on "Ways in which Scientific Instruction might become a Greater Education Factor."

Miss Marie Taylor of Central City favored us with a solo "The White Ribbon."

Mrs. Roark gave us an interesting talk and made a report on the Alms House Work.

Reports from other Departments of the work were made, showing a forward movement which is encouraging to all.

Mrs. Rachel McNeal led "Round Table Talk," several different members speaking on vital subjects.

It was moved and seconded that this meeting go down as the "Jubilee Convention." So many good and helpful things were said and such a feeling of Christian Union manifested that this day will long

Kills Self By Drowning.

F. E. Keown, of Central City, committed suicide there last Friday morning by jumping head first into a barrel of water near the I. C. track. He had been seen standing on the track just east of town acting rather queerly, as he had been for some days. His wife had taken their children and gone to Louisville a few days before, telling him that she would not return to him, and he had been depressed over it. Keown was well known here, where he ran a butcher shop a few years ago. He has been in poor health for some time, and not able to work.

School Opens September 7.

The Greenville Graded School will open Monday September 7. All pupils will assemble in the auditorium of the new building. Departmental work will be from the fifth to the twelfth inclusive. Teachers, C. C. Hayden, V. M. Moseley, Emma Taylor, Mrs. C. C. Hayden, Miss Hortense Moseley, Miss Majorie Hudspeth, Miss Grace Thatcher, Miss Nell Johnson, Mrs. Mayne Roark, Mrs. Margaret Thomas, Mrs. Folly Rice. Grades one, two, three and four will be in the new building. All parents are invited to attend the opening exercises.

G. E. Countzler is headquarters for LIV-VER-LAX.

### THE RAINS DESCENDED

By BREVARD MAYS CONNOR.

"Oh, if it would only rain," she had said wearily.

Little enough to take offense at if we weigh the words one by one, and consider their simple import, but she had said it more than once that day, and the reiteration had told on the man's nerves, already strained to the breaking point by weeks of enervating dry heat.

He had looked across the table with a look in his eyes hers could not bear.

"Will—you—shut—up!"

She had sat stunned for a moment, and then, choking down a dry sob, said:

"I'm sorry, Dick. You've been so worried. It's been terrible—this year."

His face did not soften, and he laughed harshly.

"Yes, this year and last, and the year before that, and all the rest of the years to come probably." He stood up abruptly. "I'm going to town."

She noticed the slight stoop of the boyish shoulders and the listless drag of his feet, and then she turned and looked out across the baking fields, where the crowding rows of gray-green corn drooped as if the heat were heavy and bearing them down.

The child that lay on the bed tossed and wailed fretfully. After she had soothed it back into an uneasy slumber, she commenced to clear the table, working swiftly to ease the constriction in her breast.

When her fingers touched the finely-chiseled edges of the cut-glass sugar-bowl that stood incongruously amid their homely ware, she paused and whispered aloud the thought that this bare touch had awakened.

"He travels the fastest who travels alone."

His mother had said it—the same who had given them the sugar-bowl—saw it in her presence when she and Dick had gone to tell her their resolve, that they were going to be married.

Placing the ironing-board across the backs of two chairs, she lifted the iron from the stove and tested it with a moistened finger. The light breeze that stirred the curtains felt cool on her damp brow, but she did not look up to see the green haze.

Neither did she note the far-off hum, like the hum of bees when they gather at the home hive at nightfall—a hum that grew louder, and swelled in volume till it sounded like the rumble of a thousand busy looms—louder, louder.

An every note sang through it; louder and louder, and louder and higher like the increasing roar of advancing war.

The shrieks of the child seemed feeble and impotent in the face of the roar, as she seized it up and plunged head down into the swirling dust outside.

For a moment she was but a plaything of the storm that whirled her skirts above her head and blinded her. She was hurtled along until she stumbled and fell to her knees on a mound of earth, which with a heart-leap of joy she recognized as the storm-house.

Then the door yielded, crashed down over their heads, and from pandemonium she stepped into peace.

Long she sat with wide-stretched eyes staring into the darkness of their refuge, until things began to take on a dim, ghostly shape, and even the dirt wall opposite came into view.

The mutter was dying lower and lower, and the whine was stilled, when suddenly there came a clear, sharp tap on the tin door of their refuge. She caught her breath and strained to hear. Yes, there was another, and two, three, four, until it sounded like the preliminary rattle and then the full rolling of a drum.

The woman breathed in deeply, audibly, and then she screamed:

"Baby!—the rain!—the rain!"

Swiftly she rushed up the four steps and pushed back the trap-door, half sobbing, half laughing crazily. She lifted her arms and let the water stream down her upturned face, as if she were drinking it in along with the thirsty earth.

It was salvation to her life that had been so near ruin that very day, for was salvation to the corn wherein lay their hopes, and with a glad heart she turned to watch the torrents pouring on their fields.

It crept into her face, into her eyes, until she could no longer bear to look, and turned. There lay the house in a ludicrous mass, one beam erect, like a man lying on his side, his foot in the air.

She did not hear the mad splashing of a horse down the road, where her husband, bareheaded, came galloping wildly through the rain, a terrible tear in his eyes.

He did not notice the fields, nor even the house, but when he saw her standing there disconsolate, his eyes lit up with a great joy, and the look of terror fled. Swiftly he came up to her.

"Dick!" she cried. "Oh, Dick, look at the corn!" but he opened his arms and stilled her against his breast.

"The corn? What do I care for the corn?" And he kissed her again and again.

### VEAL DISHES.

The best season for veal is from April 15 until the first of July.

*Fillet de Veau.*—Lard the fillet with strips of salt pork. Brown in butter or other drippings until well browned, then lay the larded side up. Add one and a half cups of good stock, one cupful of tomato juice, a rind of a quarter of an orange, and a seasoning of salt and pepper. Cover and simmer gently for twenty minutes, then set the pan in the oven and cook a half-hour to brown the meat. Serve on a platter with criss or parsley at the end. New potatoes and peas with carrots make good vegetables to serve with it, or to cook with it.

Veal suffers in reputation because it is often put on the market too young. It should be at least six weeks old before butchering, and if well cooked and properly seasoned is not hard to digest. Veal, because of its gelatinous composition, slips down too easily when being mastenched, and often it is not well divided in the mouth and consequently causes intestinal trouble.

Veal also spoils quickly and in hot weather should not be kept long. Veal with a bluish tinge is not fit to buy. It either indicates an undercooked animal or, more probably, too young for the market.

When buying veal select only that which is pinkish (tint of roses); this will, if the flesh is firm, insure a good product.

*Stuffed Flank of Veal.*—Spread out the flaps which has been prepared by the butcher, make a stuffing of one cup of coarse meat, two cupfuls of bread crumbs, a teaspoonful of grated onion, one teaspoonful of minced orange rind, one tablespoonful of Worcesterhire sauce and a good sprinkling of salt and pepper. Add one egg, put the foremeat or stuffing in the center of the flank, roll carefully and tie in strips of muslin. Drop into a pot of boiling water to cover and cook gently for 45 minutes. Turn carefully while cooking with a wooden spoon, so that the meat is not punctured. Serve cold thinly sliced.

*Nellie Maxwell.*

Heaven sends us good meat but the devil sends us cooks.—Garrick.

Hunger is the best seasoning for meat.—Cicero.

May every bite please your appetite.

### SEASONABLE DISHES.

Calf's liver is good at this season and more plentiful. Did you ever try serving it sliced cold? It is a delicate tidbit.

*Braised Calf's Liver in Casserole.*—Lard a liver weighing two pounds or two and a half. Put two tablespoonsfuls of butter in a casserole, salt and pepper the liver on all sides; add three small onions, four carrots cut lengthwise in quarters, add one and a half cupfuls of stock, cover the casserole and cook one hour. Take out liver and arrange the vegetables around it. Make a gravy with the liquor in the casserole.

*Normandy Cake.*—Take a loaf of cake, cut a slice from the top and hollow out the rest, leaving a box a half-inch thick on sides and bottom. Fill with crushed sweetened strawberries, put on the top a heaping layer of sweetened whipped cream. The crumbs from the center may be reserved for another dish or added to the berries.

*Perfume d'Amour.*—Fill sherbet glasses with strawberry ice cream, add a spoonful of strawberry syrup to each glass and garnish with sweetened whipped cream and a whole strawberry.

*Frozen Strawberry Shortcake.*—Make esp cakes, and when cold hollow out and fill with strawberry ice, top with whipped cream and a fresh berry for garnish.

*Steamed Chicken.*—Cut up chicken for fricassee, brown in butter, then add a cupful of boiling water and simmer for half an hour. Remove the cover and let re-brown. The gravy is especially delicious when the chicken is cooked this way.

*Tomato and Pineapple Salad.*—A slice each of pineapple and tomato put together in the form of a sandwich with mayonnaise dressing between is a very good combination.

*Junket with Chopped Pineapple.*—Junket with chopped pineapple makes a most delightful and refreshing dessert. Serve the chopped pineapple on the junket at the table, as it will look better than if allowed to stand.

*Nellie Maxwell.*

### Some new and exquisite designs in jet jewelry are shown here. In some instances they are combined with pearl and again rhinestones serve to intensify the blackness of the jet. A string of jet beads in graduated sizes and alternating with pearls is shown on the upper left. To the right of this is a brooch in cameo effect with decoration of rhinestones. A necklace of jet and rhinestones is shown at the upper right. A novel effect is shown in the center design, where from a single strand of brilliants are suspended little squares composed of jet beads; the bowknot is of jet and rhinestones with pendants of small jet beads. The remaining bowknots and belt buckle are of cut jet and rhinestones.

### Pearl Rose.

A single flower worn at the waist proved such an attractive fancy that in London and Paris designers have perpetuated the dainty custom by introducing a jewel rose. A rose made of pearls is very pretty indeed, and, though the material is strange, the effect is good. It is a big blossom, and the pearls are used in different sizes and tints.

### Hat Box Device.

Slit open the two upright edges of your hat box so that when the cover is raised this side will drop as if hinged. This is a good plan when the box is kept on a shelf, as the hat can be taken out without taking down the box. If the hat boxes are covered with a pretty wall paper, the appearance of the cupboard is improved.

*Nellie Maxwell.*
